Tell Theresa May and Donald Trump...

Stop bombing Syria

DONALD TRUMP and Theresa May have launched missile strikes on Syria.

The Assad regime is murderous but Trump and May don't care about innocent civilians in Syria. These attacks will only add to the horror and risk a wider war.

Theresa May did not hold a vote in parliament. She knows a YouGov poll a few days earlier showed that just 22 percent of people backed missile strikes on Syria with 43 percent opposed.

The politicians who support the bombng raids are the same ones who set their face against refugees—including Syrian children—being allowed into Britain. They are the same ones who ignore or urge on the recent massacres of unarmed Palestinians. There's never enough money for health or education but there is always money for war.

We support demonstrations against the war.
